Early booking is essential to secure your place!

Class sizes are small to ensure each participant can develop and review achievable and personalized driving plans each session.

Some participants initially choose to have on-road practice and feedback from a FOD recommended specialist driving instructors in your area. Pre-booking your driving lesson/s between workshop sessions is essential as it allows you to apply discussed techniques on-road.

The Fear of Driving program recognizes and encourages the active involvement of family and friends to provide you on-going driving support.
